

SFX Machine is back!

And this time...

It's real-time

Announcing SFX Machine RT™

The ultimate multi-effects plug-in

for Mac OS X, Mac Classic, and Windows

Sure, the original SFX Machine™ won lots of awards — Editor's Choice for Best DSP Plug-In, Key Buy Award, etc. — and it had a fanatical fan base that would be the envy of any software in the industry.

But we knew something was missing... So we asked ourselves, "Selves, what can we do to make SFX Machine the coolest plug-in ever?" No answer. Finally, in desperation, we decided to actually read that big stack of fan mail.

A common theme quickly emerged. "Dude, pleeeeeease do a VST version!" That kind of thing. Over and over, users begged, pleaded, even whined for real-time capability. Rather heartbreaking, actually.

So what could we do? We ignored them as long as we could. Eventually, though, it got to be too much, so we finally broke down and developed not one but two (or four, depending on how you count them) new real-time versions:

SFX Machine RT, including

- Audio Unit for Mac OS X
- VST for Mac OS X
- VST for Mac Classic,

and

SFX Machine VST for Windows

Now everyone can have fun and live happily ever after! SFX Machine RT is proud to be one of the first commercial plug-ins to support Apple's new Audio Unit format. And not only are we adding Mac OS X support, but now for the first time PC owners can join in the delighted-jumping-up-and-down that *is* SFX Machine.

At the heart of SFX Machine RT is a powerful modular synthesis engine. But you don't have to be an engineer to use it! The interface features the simplicity of a multi-effects box, allowing users to select and modify presets with just a few mouse clicks.

Did we mention that we've added full MIDI parameter control for automated preset modification, using a simple 'MIDI Learn' system? Can you say, "new dimensions of interaction?"

SFX Machine RT comes with hundreds of presets, including:

Conventional effects

- Tremolo ● Vibrato ● AM ● FM ● Chorus ● Delay ● Echo
- Flanging ● Ring Mod ● Triggered Wah

Unique effects

- EchoFeedback ● Sitar Drone ● FlangeVerb ● Pitch Tracked Pan
- MultiVox ● Crystal Gliss ● Velvet Chimes ● Munchkin Chorus
